

Autumn Term 2026
Touch Typing Club at The Vineyard School

Sept **10 17 24** Oct **1 8 15** (Autumn 1 £126)
Nov **5 12 19 26** Dec **3 10 17** (Autumn 1 £147)

TypeQuest

Touch Typing is finding the keys of the keyboard with the sense of touch rather than looking at the keys. When the skill of touch typing becomes automated, the student can focus on creativity and the content of their work and will be able to produce more in less time. TypeQuest offers fun and engaging clubs where learners are motivated to practise their typing in a nurturing environment.

The **Autumn Term 2026 Touch Typing Club at The Vineyard School** will run on **Thursdays from 15:15 to 16:15** for **6 sessions (Autumn1)** during the first half of the term and **7 sessions** during **Autumn 2**.

The course fee for Autumn1 is **£126 (incl. touch typing software for home use)**

The course fee for Autumn 1 is **£147 (incl. touch typing software for home use)**

The web-based touch typing software licence is part of the course and works on any device from any location. The individual user licence can be used to practise away from the classroom, and students are encouraged to practise regularly. The bite-sized touch typing exercises and games offer age-appropriate and stimulating learning modules. The students are rewarded with virtual pets and new achievement levels as they progress through their activities. Learning progress will be monitored. In class, we will use customised learning keyboards to reduce the temptation to look at the keys.

This course is suitable for children from **Year 3 to Year 6**. Please contact **Sybille Freeman** at sybille@typequest.club to book a place for your child.

Why learn to touch type?

Touch Typing is fun and quick to learn. It is a fantastic life skill with measurable advantages for further education and beyond. Learning a new skill will boost confidence and self-esteem in children. Pupils will be able to produce twice the amount of work in less time. Typing becomes more accurate, and less time is spent on editing.

Being able to touch type frees the brain to focus on other aspects of work, like content and creativity. It will help children with dyslexia and other handwriting-related learning needs. It will help to produce legible and presentable work.
